More than a source for your commercial building products…

A Partnership

Dear Partner,

Thank you for your continued confidence in Babcock-Davis. On behalf of the entire company, I can tell you that we are motivated and inspired to grow our partnership. Working with you to deliver commercial building products and services that exceed your expectations is our top priority.

For over 100 years, we have remained dedicated to building and designing the highest quality commercial building products. Our product offering and manufacturing capabilities have grown significantly over the years thanks to the quality commitment of our many hard working employees in Minnesota. We proudly stand behind every product that we ship out every day and around the world.

Sourcing commercial building products is never as simple as it seems. This is particularly true when it comes to the type of specialty and architectural building products that we supply. It takes a collaborative effort of resources and information to get the job done right. We understand all the complexities and time sensitivities involved. This is why we have built such a strong network of people and processes to better serve all of you, our partners. We do so with flexibility and nileness that fit your objectives-not ours.

We are excited for the future and the opportunity to work with you and to continue to exceed your expectations. You have our commitment that we will work hard every day to help you succeed.

If there is anything that we can do to improve our service to you, we will listen.

Sincerely,

Sue W. Thomas

Sue W. Thomas | CHIEF EXECUTIVE OFFICER
CONSENSUS STANDARDS, REQUIREMENTS, CODES AND LAWS

The placement of fire extinguishers and fire extinguisher cabinets is driven by a group of consensus standards, requirements, codes and laws. Ultimately, where, how many, and what type, will be determined by the authority having jurisdiction for that location. The authority could be as diverse as the City Building Inspector or the Deputy Chief of Staff for Installations and Logistics.

The requirements that establish placement practice are ultimately found in local fire prevention codes at one end of the spectrum or Federal Law at the other end.

For the proper location, type and number of fire extinguishers, consult with the local authority having jurisdiction. As a general guideline, we offer the following excerpt from Occupational Safety and Health Administration - Sub Part L and from National Consensus documents:

**AMERICANS WITH DISABILITIES ACT - PROTRUDING OBJECTS**

The majority of fire extinguishers, when hung on a wall, protrude more than 4 inches into walks, halls, corridors, passageways or aisles. To comply with the Americans with Disabilities Act of 1990 (ADA), objects protruding from walls (fire extinguishers) with their leading edges between 27 inches and 80 inches (685 mm and 2030 mm) above the finished floor, shall protrude no more than 4 inches (100 mm) into walks, halls, corridors, passageways or aisles. Therefore, fire extinguishers that protrude more than 4 inches must be recessed into the wall.

Babcock-Davis’ fire extinguisher cabinets allow the specifier to comply with the ADA protrusion requirements, which are identified in each dimensional table found in this catalog.

*Please note the column headed ADA Compliance to specify the appropriate fire extinguisher cabinet.

**FIRE EXTINGUISHER SIZE AND PLACEMENT CRITERIA (PER NFPA 10)**

**FOR CLASS A HAZARDS**

<table>
<thead>
<tr>
<th>CRITERIA</th>
<th>LIGHT OCCUPANCY</th>
<th>ORDINARY OCCUPANCY</th>
<th>EXTRA OCCUPANCY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Rated Single Extinguisher</td>
<td>2-A</td>
<td>2-A</td>
<td>4-A</td>

</tr>
<tr>
<td>Maximum Travel Distance to Extinguisher</td>
<td>75 ft.</td>
<td>75 ft.</td>
<td>75 ft.</td>
</tr>
</tbody>
</table>

**FOR CLASS B HAZARDS**

- **Light (Low)**: 5-B, 10-B; Maximum Ext'g Rating: 30 ft.; Maximum Travel Distance to Ex't'g: 30 ft.
- **Ordinary (Moderate)**: 10-B, 20-B; Maximum Ext'g Rating: 30 ft.; Maximum Travel Distance to Ex't'g: 50 ft.
- **Extra (High)**: 40-B, 80-B; Maximum Ext'g Rating: 30 ft.; Maximum Travel Distance to Ex't'g: 50 ft.

**FOR CLASS C HAZARDS**

Class C ratings are required where energized electrical equipment is encountered. Since fire itself is a Class A or B hazard, the extinguishers are sized and located on the basis of the Class A or B hazard.

**INSTALLATION OF FIRE EXTINGUISHERS**

Portable fire extinguishers shall be securely installed on the hangers or in the bracket supplied or placed in cabinets or wall recesses. Wheeled-type extinguishers shall be in a designated location.

Extinguishers having a gross weight not exceeding 40 Lbs. shall be installed so that the top of the extinguisher is not more than 5’ above the floor.

Extinguishers having a gross weight greater than 40 Lbs. shall be installed so that the top of the extinguisher is not more than 3’-6” above the floor.
Select
FIRE EXTINGUISHER CABINET

This Select Fire Extinguisher Cabinet is the industry’s most popular design. Available in various door styles and mounting options to complement virtually any type of construction.

FEATURES

CONTINUOUS PIANO HINGE  Built with a continuous hinge to combine aesthetics and provide sufficient support for the cabinet door operation.

SAFETY GLASS  Constructed with tempered safety break glass, this cabinet will keep you safe from risk of injury in the event of an emergency.

DETAILS

MATERIAL
- Cold Rolled Steel, White Polyester Finish
- Aluminum
- Stainless Steel

DOOR  Full Glass, Duo-Vertical Panel, Duo-Vertical Panel with Lock, Solid Flush Panel or Solid Flush Panel with Lock

GLAZING  None, Tempered Safety Glass, 1/4 inch Wire Inserted Glass, 1/8 inch Acrylic

MOUNTING  Recessed, Semi-Recessed, Surface or Trimless

SIZE  Determined by the fire extinguisher size and available wall depth (see table below)

OPTIONS  Lettering, Fire-Rating, Rolled Radius

Fire Extinguisher Sold Separately

Vision
FIRE EXTINGUISHER CABINET

Vision Fire Extinguisher Cabinets feature the ultra-clean, contemporary look of a full acrylic door, available in five eye-pleasing panel colors. In addition, a host of letter colors and placement options make it easier than ever to specify a truly modern, durable and functional fire extinguisher cabinet.

FEATURES

PUSH LATCH HANDLE Designed for the door to safely open and close with the use of a magnet. No need to turn a handle... simply push and latch.

GRAVITY PIVOT HINGE The door is constructed with the hinges at the top and bottom of the door so that it will swing freely.

Vanguard
FIRE EXTINGUISHER CABINETS

The Vanguard Fire Extinguisher Cabinet distinguishes itself with an exceptionally refined look that’s realized by concealing all handles and hinges. Depending upon door style, glazing and other options chosen, the Vanguard cabinet can be designed to effortlessly blend into its surrounding environment or be unmistakably conspicuous.

FEATURES

CONCEALED DESIGN The frameless design of the Vanguard series allows the cabinet to be camouflaged into the wall.

SAFETY BREAK GLASS Constructed with tempered safety break glass to protect against cuts in the event of an emergency.

A convex, clear plastic “bubble” window is the earmark of the Crown Fire Extinguisher Cabinet. This ultra-practical design delivers 180° of visibility for quick identification of the extinguisher. The Crown’s shallow design is also ideal for contemporary structures with limited wall depth.

**FEATURES**

**STYLISH BUBBLE DOOR** Add 180 degrees of visibility to your fire extinguisher with the bubble window.

**ACRYLIC PLEXIGLASS** Constructed with durable clear, bronze or smoke colored acrylic plexiglass.

Fire Extinguishers

PRINCIPLES OF SELECTING EXTINGUISHERS:

- Type of potential fire hazard.
- Severity of potential fire hazard.
- Environmental conditions of potential fire hazard.
- Effectiveness of extinguisher on potential fire hazard.
- Training and physical capabilities of available personnel to operate extinguisher.
- Upkeep and maintenance requirements of extinguisher.

For further information, refer to NFPA 10.

ABC Dry Chemical
FIRE EXTINGUISHERS

The ABC Multi-Purpose Dry Chemical fire extinguisher is used to provide protection against Class A, B and C fires.

Call for information on water mist “Clean Agent” and pressurized water/foam extinguishers.
Halotron I
FIRE EXTINGUISHERS

The Halotron I fire extinguisher uses an EPA approved "Clean Agent" discharged as a rapidly evaporating liquid which leaves no residue. It effectively extinguishes Class A, B and C fires by cooling and smothering and it will not conduct electricity back to the user.

Detention + Institution Cabinets

Babcock-Davis' Detention Series Cabinets provide the specifier with a substantial unitized design in 12 gauge cold rolled steel construction for maximum security facilities. All corners are mitered and ground smooth to eliminate any dangerous projections. The heavy-duty continuous hinge adds to the secure features of these cabinets.
