About T&S
With a steadfast commitment to quality, T&S Brass has set industry standards for more than 60 years and introduced a number of plumbing innovations, including the market’s first pre-rinse unit and the foot pedal valve.

Today, T&S manufactures and sells faucets, fittings, and specialty products and accessories for foodservice, industrial, commercial plumbing, and laboratory markets. Its products have become the standard for the majority of U.S. hospitals, schools, restaurants, prisons, and public facilities.

At our headquarters in Travelers Rest, SC, our associates take pride in consistently delivering the best in craftsmanship and service. We produce more than 5,000 quality products and parts that meet the requirements of the Buy American Act. T&S sells meticulously designed and rigorously built products on nearly every continent. Still family-owned and operated, reliability remains the fundamental principal behind everything we do.

Why choose T&S?
Quality and durability. T&S products are highly regarded throughout the industry for their exceptional craftsmanship and long-lasting performance. A product that can withstand millions of test cycles before failure is far more resistant to wear than our competitors.

Interchangeability. We create our parts to “mix and match,” making it easy to order the ideal product for any need. And part stocking is simplified, as there are fewer proprietary replacement parts to keep on hand.

Water conservation. T&S has been ahead of the curve in water consumption for decades, and we’ve continued to improve. We now offer more water-saving components and accessories than ever before, including one of the world’s highest-performing and lowest water use pre-rinse spray valves.

Family owned. Although we’ve been growing for more than 60 years, we’re still family-owned, helping us to move quickly and take care of our customers in a personal way that the giants can’t match.

Fast shipping. Our exclusive 24-hour Quick Ship program ensures that orders received before noon are processed the same day.

For complete product information or to place an order, visit www.tsbrass.com or call 1.800.476.4103.

Healthcare

For decades, T&S Brass has been supplying quality faucets and plumbing products to a wide variety of markets, including hospitals, nursing homes, and doctors’ offices. With more than 60 years in the market, T&S has a deep understanding of the special challenges of the healthcare market and has a range of products to help meet those unique needs.

“Lead-free” — Legislation in several states restricts the amount of lead in plumbing fixtures to less than .25 percent. T&S makes a complete line of products compliant with these requirements, and all are suitable for use in healthcare applications.

Antimicrobial — Hygiene is a critical consideration in a healthcare setting, with parts and products that clean easily and stay more sanitary between washings. T&S makes a line of products with antimicrobial coating, keeping plumbing surfaces cleaner by inhibiting the growth of microbes that can cause illness and disease.

Water and energy conservation — T&S is committed to reducing water use and conserving energy. They offer various low-flow products, sensor and metering faucets, and low-leak cartridges. This results in water savings, and because less water needs to be heated in lab or lavatory faucets, energy is saved as well.

Labs, surgical areas, patient rooms, and kitchens — T&S makes quality products for a wide range of specialty applications in the healthcare setting, including bacteriological samples, sinks, standing lab sinks, laboratory sinks, and more. They have designed products to meet the needs of various healthcare settings, ensuring compatibility and ease of maintenance.

See the inside illustration to get an overview of where T&S products have been engineered to meet these needs and more in a typical healthcare setting.
About T&S

With a steadfast commitment to quality, T&S Brass has set industry standards for more than 60 years and introduced a number of plumbing innovations, including the market’s first pre-rinse unit and the foot pedal valve. Today, T&S manufactures products for laboratories, plumbing, and industrial applications and continues to be a leader in the foodservice and commercial plumbing markets. T&S’ family-owned and operated status promotes a business model that focuses on customers, reliability, and quality.

Family owned.

Although we’ve been growing for more than 60 years, we’re still family-owned, helping us to move quickly to take care of our customers in a personal way that the giants can’t match.

Fast shipping.

Our exclusive 24-hour Quick Ship program ensures that orders received before noon are processed the same day.

Why choose T&S?

Quality and durability.

T&S products are highly regarded throughout the industry, and our brass components are used in the most demanding applications. Our products are designed and manufactured with over 100 years of experience behind them, far more than our competitors.

Interchangeability.

We create our parts to “mix and match,” making it easy to order the ideal product for any need. And part stocking is simplified, as there are fewer proprietary replacement parts to keep on hand.

Water conservation.

T&S has been a leader in water conservation for decades, offering products that use over 60% less water than comparable models.

T&S Brass Healthcare Products

• Dipperwell/Glass Filler
• Shower Valve/Eyewash
• Gas Hose
• Hand Sink Faucet
• Hose Reel/Vacuum Breaker
• Lavatory Faucet
• Pantry Faucet
• Pedal Valve
• Pot and Kettle Filler
• Pre-Rinse Unit/Mini Pre-Rinse Unit
• Sensor Faucet
• Service Sink/Waste Drain
